

Apps for Education

Compiled by Carolann Cormier

(This handout is meant to be a resource. It is not meant to be exhaustive and is not a suggestion on what apps to download. It is always helpful to review the ratings on apps before purchasing. For review of apps, click on the review button when you are on the app download page in iTunes. If a lite version is available, generally they are free or cheaper, so they can be a way for you to try an app. For childrens apps click on the Apps for Kids category in iTunes sidebar. For books click on the Books category. Use the search parameters built into iTunes for apps by clicking on the apps button when your search results come up.)

To take screen shots of your various displays press the “home” and “sleep” keys at the same time. The shot will be saved in your photos and can be emailed or used in presentations.
